

**PLATFORM FOR ONLINE
INTEROPERABILITY AND
PERFORMANCE TEST**

FIRE4LIGHT

Category A

Project details

- **Project acronym** FIRE4LIGHT

- **List of partners**

Sensinov

LAAS-CNRS

- **Start date:** 01/08/2017 **for** 10 months

- **Short description** Develop remote testing tool for lightweight device management and IoT semantic interoperability, namely OMA LWM2M combined with IPSO and integrate the developed components in the F-INTEROP platform.

- **Expected impact**

- Attract the attention of SMEs about the importance of device management as a key enabler of sustainable deployment of IoT.
- Help developing an ecosystem of off-the-shelf devices that can be equally used across different industries.

Thank you
