

**PLATFORM FOR ONLINE
INTEROPERABILITY AND
PERFORMANCE TEST**

A novel context-aware traffic analysis platform for IoT privacy assessment and reporting

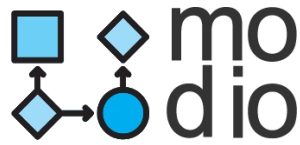

Type A – New testing tools/B

Project details

- PrivacyAnalyser

Modio
Computing

Kings College
London

- Start Date: 30th August 2017 for 10 months
- PrivacyAnalyser will be integrated to the F-Interop platform to allow experimenters to assess the privacy strength of their applications and/or services against confidential information disclosure.
- Expected impact
 - F-Interop's experimenter SMEs shall be able to assess and improve the **privacy aspects** of their applications and services.

Thank you
